

KARTHIK BABU GANJI

Senior Software Engineer | AWS Cloud & DevOps

(+91) 8686336889 | karthikbabuganji19@gmail.com |Hyderabad| [linkedin.com/in/karthikganji](https://www.linkedin.com/in/karthikganji)

PROFESSIONAL SUMMARY

- Senior Software Engineer with over 7.8 years of experience in IT operations, specializing in AWS Cloud and DevOps methodologies.
 - Currently spearheading system reliability for the IBO e-commerce platform at 7Kingscode, ensuring seamless end-to-end delivery of high-performance scalable solutions.
 - Proven track record in optimizing technical operations and network administration at TCS-iON, successfully delivering large-scale digital assessments for 500+ simultaneous users.
-

PROFESSIONAL EXPERIENCE

Senior Software Engineer — 7Kingscode Software Solutions Pvt. Ltd.

IBO E-Commerce Platform Hyderabad, India | June 2021 – Present

- Engineered and maintained core components of the IBO e-commerce platform, delivering high-impact features across frontend and backend layers to boost system capability.
- Developed responsive, high-performance user interfaces using React.js and Next.js, significantly improving site speed and customer engagement metrics.
- Architected technical solutions by collaborating with cross-functional product and design teams to translate complex business requirements into robust code.
- Participate in code reviews, sprint planning, and daily stand-ups following Agile/Scrum methodology.
- Automated application deployments and established proactive monitoring in production environments to maintain 99.9% platform uptime.
- Resolved critical production bugs through rigorous root cause analysis, reducing recurring technical debt and improving overall platform stability.
- Optimized cloud infrastructure on AWS, leveraging scalable storage and hosting solutions for seamless e-commerce operations.
- Integrated complex APIs for payment gateways and inventory management, streamlining the end-to-end checkout and order processing workflows.
- Maintain code quality through version control best practices using Git/GitHub, including branching and pull request reviews.
- Spearheaded continuous improvement initiatives, identifying and implementing performance optimizations that accelerated development cycles.

Associate Software Engineer — 7Kingscode Software Solutions Pvt. Ltd.

Qalara | Hyderabad, India | Feb 2019 – June 2021

- Worked as L1/L2 On-Prem Application Support Engineer.
- Administer OpenShift cluster environments, including monitoring pod/node health and executing scaling operations (upscaling/downscaling) to maintain optimal application performance.

- Troubleshoot container crashes by managing recursive pod restarts, performing manual interventions when scheduled restarts fail, and analyzing pod/node logs.
- Automate the deployment of web application archives (WAR files) to Apache Tomcat servers using ansible scripts.
- Analyze application runtime logs to identify stack traces, unhandled exceptions, and system anomalies.
- Manage real-time infrastructure and application alerts using CA Unified Infrastructure Manager (UIM / Nimsoft), Nock Early Warning System (NEWS), and Grafana dashboards for PostgreSQL database health.
- Monitor critical system metrics (CPU utilization, memory, disk capacity) based on defined SLA thresholds to prevent unplanned downtime.
- Serve as an L1/L2 escalation point for cross-functional teams, driving end-to-end resolution of incident tickets according to ITIL standards.
- Conduct Root Cause Analysis (RCA) for major severity incidents and author detailed Incident Post-Mortem Reports for key stakeholders.
- Execute routine operational health checks and participate in weekly scheduled maintenance activities.

Operation Executive — TCS-iON

Deccan Park, HITEC City, Madhapur, Hyderabad, Telangana, India | June 2018 – February 2019

- Executed end-to-end operational support for large-scale online assessments, ensuring high integrity and security for critical TCS-iON projects.
- Administered complex network configurations, maintaining 100% system availability across dedicated exam center infrastructures.
- Monitored server health in real-time during live sessions, proactively identifying and mitigating technical risks before they impacted candidate performance.
- Troubleshooting and resolving system errors with high urgency, ensuring zero downtime for examinations involving 500+ simultaneous candidates.
- Supervised the successful delivery of high-stakes online examinations, maintaining strict compliance with standardized testing protocols.
- Coordinated hardware and software maintenance cycles with technical teams to eliminate points of failure during active examination windows.
- Ensured compliance with exam protocols and data security standards throughout the testing process.
- Maintained detailed logs and incident reports for technical issues encountered during examination cycles.
- Provided end-of-session support and reporting to ensure accurate completion and closure of examination batches.

EDUCATION

Bachelor of Technology (B.Tech) – Electronics & Communication Engineering

Jawaharlal Nehru Technological University (JNTU), Hyderabad | 2017

Intermediate (12th Standard)

Board of Intermediate Education, Andhra Pradesh | 2011

TECHNICAL SKILLS

Cloud & DevOps	AWS (EC2, S3, VPC, IAM, RDS, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, CI/CD, Terraform
IT Operations	Network Administration, Server Monitoring, Technical Troubleshooting, Incident Resolution
Version Control	Git, GitHub, GitLab, Bitbucket
Databases	MySQL, PostgreSQL, MongoDB, DynamoDB
Operating Systems	Linux (Ubuntu, RHEL, CentOS), Windows Server
Business & Leadership	Project Coordination, Stakeholder Communication, Team Leadership, Agile/Scrum, Business Analysis
